General Poker Information

Poker is being played with a 52 card deck. The player is dealt two cards face down at the start. Only the player knows which cards he has. During the game the player gets the chance to continue, to place bets or to fold (quite).

When the game continues three more cards are dealt face open (Flop), thereafter two single cards will be dealt face open (Turn and River). The players result is determined by the value of the 5 highest cards.

Royal Flush: A royal flush contains the highest 5 cards of the same suite in sequence (e.g. A, K, Q, J, 10 all blades).

Straight Flush: A straight flush contains 5 cards of the same suite in sequence (e.g. 8, 9, 10, J, Q all blades).

Four of a Kind: Four of a kind contains 4 cards with the same ranking (e.g. 10, 10, 10, 10).

Full House: A full house contains three matching cards of one rank and two matching cards of another rank (e.g. 6, 6, 5, 5, 5).

Flush: 5 cards of the same suite (e.g. 2, 5, 6, 8, Q all blades).

Straight: 5 cards in sequential rank but in different suites.

Three of a kind: Three cards of the same ranking (e.g. 10, 10, 10).

Two pair: Two cards of the same rank, plus two cards of another rank.

One pair: Two cards of the same rank.

High card: When the poker hand doesn't contain one pair, the card with the highest rank is the 'high card'.

Casino Hold'em Poker

Casino Hold'em offers a regular poker gameplay and the option to bet on a hand of at least a pair of aces on the first 5 cards (AA Bet). At Casino Hold'em the dealer qualifies on a pair of fours or better. When the dealer's hand is lower than a pair of fours, the dealer won't "call" the bet and the player will win.

Lowest initial bet: € 0,10

Highest initial bet € 100,00 (+ €50 AA bet)

Game Play

The player makes an Ante bet and may make an optional AA bonus side bet to start the game. The bet value can be set by selecting chips in the bottom right corner and place the chips in the 'Ante' field.

The player and dealer are both dealt two cards (face down). Three cards are then dealt to the board. After checking his/her cards, the player has to decide (a) to fold with no further play losing the Ante bet

or (b) to make a Call bet of double the Ante bet.

When the player makes a Call the dealer will deal two more cards to the board, for a total of five. The player and dealer make their best five card poker hand from their own two personal cards and five board cards. The player's hand is compared with the dealer's.

The dealer must have a pair of 4s or better to qualify. If the dealer does not qualify, the Ante bet pays according to the pay table and the Call bet is a push (standoff). When the dealer qualifies, and the player's hand is better than the dealer's, the Ante bet pays according to the Ante-Win pay table (see below) and the Call bet pays 1:1

When the dealer qualifies, and the dealer's hand is equal to the player's, all bets are push (it doesn't win or lose). If the dealer qualifies, and the dealer's hand is better than the player's, the player loses all bets.
